

EXCENTRIC

Excelling Human-Centric Collaborative Ecosystems for Smart Digital Transformation in CCI

WHAT IS ARCHS?

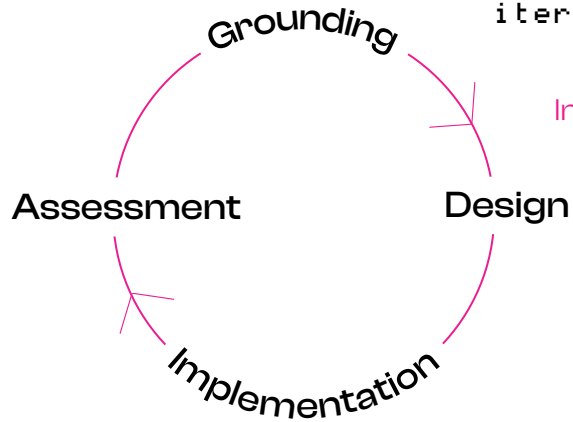

A framework guiding cultural and creative sectors through ethical, inclusive, and future-ready digital transformation.

Why it matters

CCSI often lack data skills or see data as irrelevant. Our goal is to enhance their competitiveness and sustainability with ARCHS; to help them shift from isolated efforts to Collaborative Data Ecosystems (CDEs).

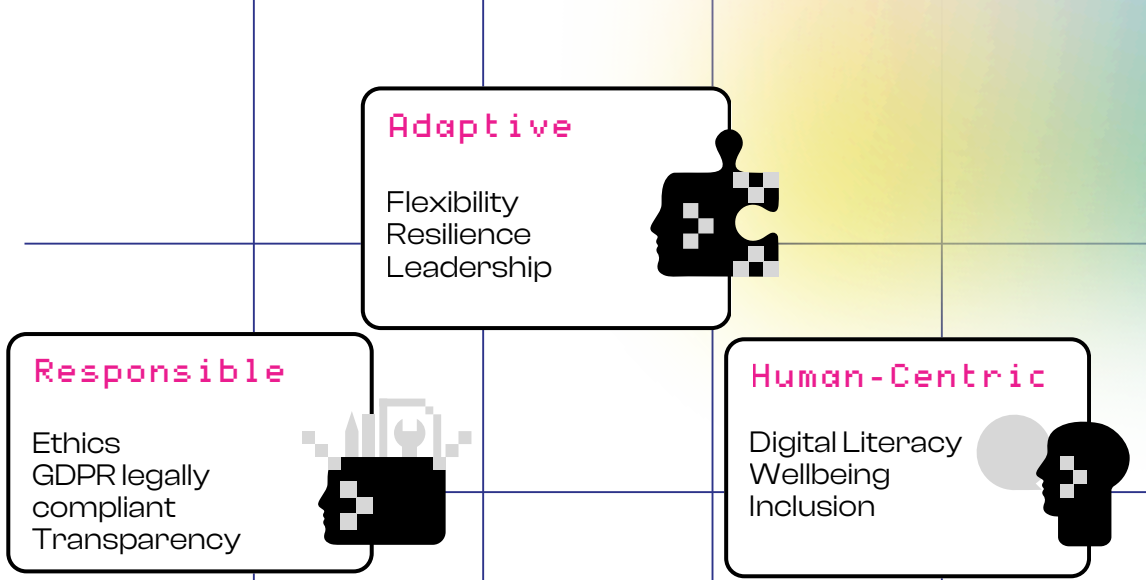

How it works

ARCHS is applied iteratively across pilots

Informs diagnostics, tool development, and transversal analysis.

Supports both internal reflection and external collaboration.

The 5 principles at one glance

ARCHS Compass

A dynamic tool for tracking progress

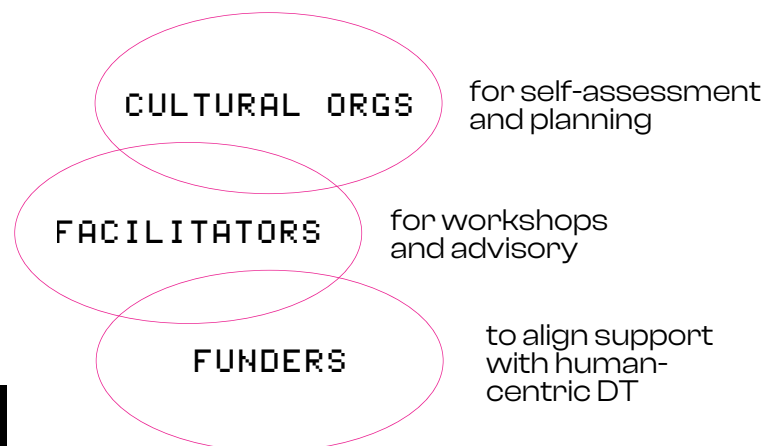

Supports strategic planning and value alignment

Will be included in the final Toolkit on Collaborative Data Practice.

What it measures

- Individual:** Skills, Mindset, Digital fluency
- Organisational:** Governance, Maturity, Workflows
- Network:** Collaboration readiness, Data-sharing practices

Who can use it

Funded by the European Union
